

*"With INTELLIHOME,
we have the daily routine
round our house under
control"*

Jennifer und Robert DAVIS,
house owners

HOME MANAGEMENT MADE EASY

INTELLIHOME is the perfect solution for comfortable living. A fully developed system manages all tasks; all around lighting, security, room temperature, aeration, acoustic irradiation and multimedia.

COMFORTABLE AND SIMPLE TO USE

All your home's technical functions are managed by a single automated controller. The operation takes place simply and comfortably via switcher, remote control, touch display, mobile phone or internet from anywhere in the world.

A CARE FREE MIND

Let your mind wander, from now on Intellihome reliably takes care of your house: electricity is switched off automatically, windows shut when it rains and your presence is simulated when you are on holidays.

SAVING TIME AND MONEY

Not only does your personal time budget benefit from Intellihome, but the energy saving potential can save you money too, e.g. standby devices can be disconnected, the reduction in heating during airing can save up to 30% of energy.

intellihome[®]

Intellihome is a specialist for the automation of buildings. We turn a house into an intelligent house, a room into an intelligent room. Through our commitment, living and working becomes a new experience - trouble free. In a modern Intellihome environment one push of a button is enough to start an array of sequences. Windows open and shut themselves, lights go on and

off - everything fully automatic and optional at the same time. Regulated by a remote control, touch-display or switch-key.

Life is so easy - with INTELLIHOME.

YOUR HOUSE DANCES TO YOUR TUNE

PRIVATE LIVING

intellihome®

INTELLIHOME - BRINGS COMFORT TO YOUR LIFE

The increase in household electronical devices brings new demands for the users. It requires an overview of all the technical functions and remote controls within your home. You need to keep an overview of all the arrangements and the appropriate remote controls. The modern technique of Intellihome Private Living is the perfect solution for comfortable living.

LIFE STYLE - ACCORDING TO YOUR PERSONAL WISHES

The intelligent systems of Intellihome summarize the sequence of the most important functions.

They are sensitively orientated to the individual user's requirements.

You as the customer decide, in what order the devices and functions will be controlled. You design your individual, practical arrangements: the morning alarm can be heard at a pleasant volume, the blinds open just a little bit and from the kitchen you can smell your morning coffee waiting for you.

INTELLIHOME Private Living designs a pleasant way of living, according to your individual wishes.

It seems to be invisible, but is noticeable to all your senses.

THE DIFFICULTY OF CHOICE ...

Everyday we've got many choices to make: remote control TV, remote control DVD-player, remote control surround system, remote control HiFi, remote control video. Dozens of devices waiting to be used and the same amount of remote controls to match.

Added to this an incorrect sequence will leave the screen blank!

... OR USING INTELLIHOME PRIVATE LIVING

You can take the easier route and let INTELLIHOME Private Living work for you.

A central control-unit replaces the countless remote controls; at the push of a button you activate all necessary devices: the TV goes on, the lights dim down, the room gets dark and your chosen program starts - because the TV channel is automatically pre-programmed.

YOUR LIVING SPACE
THE PERFECT
SOLUTION

MULTIMEDIASYSTEM ACTIVE

ALL INCLUSIVE IN INTELLIHOMES PRIVATE LIVING

INTELLIHOMES Private Living is the perfect solution for households of every dimension. Whatever your wishes, the modular built systems of INTELLIHOMES makes them come true. Living areas can be designed, according to your requirements, making automated house-control easy.

You define your most important functions, plan sequences and tasks and INTELLIHOMES does the rest.

COMFORT AND SAFETY

The systems of INTELLIHOMES offer the highest comfort. As expected, INTELLIHOMES fulfils your security demands with true reliability.

With INTELLIHOMES Private Living you gain a new feeling of comfort and on top of it you save energy.

This forward thinking system takes into account the effective use of energy resources.

PRIVATE LIVING - COMFORT AT THE PUSH OF A BUTTON

OPERATION & REMOTE CONTROL

Operation is so easy: You control Intellihome Private Living by using push-buttons, mobile phone, remote control or touch-screen. The screen

can be functionally designed according to your requirements - playful or down-to-earth - clarity is guaranteed!

MUSIC

Enjoy music in your perfect individual atmosphere: dimmed lights, darkened windows, programmed settings This way enjoying music becomes a truly all-round experience.

TV / SAT / DVD

From source to picture - audio/video entertainment has never been easier to use. Enjoy total entertainment pleasure within your own four walls.

TIME CONTROLLING

Technical sequences are precisely controlled: blinds close at 7:00 pm, water in the fish-tank is circulated every two hours - your house thinks for you!

LIGHTING/BLINDS

Dimmed lights for your nightly walk to the toilet, blinds shut when it's too bright Intellihome provides you with the best visual conditions.

IRRIGATION

Flower garden or greenhouse, regular irrigation according to the needs of the plants, keeps them fresh.

ALARM FUNCTION

Locking system, alarm device, video control - protect your home from encroachments. Be warned, if uninvited guests enter your home.
